The Wayside Gardens Co.

MENTOR, OHIO

A New Barberry

BERBERIS MENTORENSIS

(Plant Patent No. 99)

is the result of a cross between Barberry Thunbergi and Barberry Juliana. It has very rugged, strong, upright growing branches and quite formidable thorns. Its foliage is heavy and thick and of perfect color—a green as dark as the Japanese Yew.

In Northern Ohio the leaves remain green until after the holidays, are dropped during the late winter, and new foliage appears early in April. Plants growing south of here retain their foliage much longer. In southern parts of the country, Berberis Mentorensis is evergreen.

Its most valuable attribute is its ability to withstand heat and drought. Few other shrubs or hedge plants are able to go without water and withstand intense heat as Barberry Mentorensis and look as well. During the hottest weather there is never any sign of wilting or burning, much to the amazement of everyone.

Upright growth; easy upkeep (requires really no pruning), and its tenacious foliage, more than compensate for the lack of berries. We heartily recommend Berberis Mentorensis to you and claim it to be the best moderately priced and perfectly hardy hedge plant to date.

There are six outstanding points of superiority about this Barberry:

First—it is evergreen practically the year around. Think what that means.

Second—its sturdy, erect growth carries a thick dark green foliage right down to the ground. Is never bare-legged.

Third—when used for a hedge, its thorny, strong growth forms a formidable barrier to man or beast.

Fourth—needs no pruning. It is of erect growth which becomes dense when the plant is three or four years old. No upkeep! No pruning!

Fifth—combined in a foundation planting with evergreens, it provides a beautiful and artistic contrast at very small expense and without elaborate preparation of soil.

Sixth—is not “choosy” about where it grows. No matter if you can’t make other broad-leaf evergreens, such as Azaleas and Rhododendrons, thrive in your soil, this new Barberry will. It is equally at home whether it is acid or alkaline soil.

Bushy, young stock, 12 to 15 inches tall:

\$20.00 per 100.

75c each

p. s.

Allow us again to say, it is the nearest reasonable cost perfect shrub for foundation planting and hedges that we know about.

A five-year old hedge which has never been clipped. Note its fullness and natural splendid form.

Charge

We want to present
you with two plants
of the *New*

MENTOR BARBERRY

(*Berberis Mentorensis*)

Plant Patent No. 99

To all of the Wayside friends, whose orders for plants or seeds this spring are \$10.00 and over in 1937, we will send you without charge, two husky plants of the new Barberry Mentorensis. It is a splendid new shrub for use around foundations, for planting alone or among groups of evergreens or shrubs, as well as being ideal for hedges.

This no charge offer is not in any way a bait. It's made to you simply because it costs a lot of money to successfully advertise any new plant or shrub. So we are going to give away to our customer friends, two plants of this unusual Barberry for pure and simple advertising purposes. Once it is growing on your grounds you can't help but sing its praises. That's the best kind of advertising we know.

For Shady or Sunny Places

It contradicts itself in the way it thrives so satisfactorily under directly opposite conditions. Unlike other Barberries, it flourishes both in the shade and in the sun.

When used for a hedge, that means there will be none of the usual thin spots or holes in the hedge where it is shady. Being heavily thorned, it makes a formidable barrier. Dogs and ruthless boys take no liberties with it.

Laughs at Dry Weather

One of the amazing things about this Barberry is the way it thrives regardless of how dry and hot the summer may be.

Truth to tell, we didn't know it so unfailingly had that invaluable trait, until letters started coming to us. Letters from last summer's drought-affected Kansas and other parts of the country. Parts where for months there was not a drop of rain.

Here's Drought Proof

Let us quote from a letter of Mortimer Burroughs, received last October. He is a garden architect at Clayton, Missouri. This is what he says:

"I have been much impressed with the new Barberry Mentorensis during the terrible drought we had in St. Louis this summer.

"We moved several when in full leaf last spring. Planted them on the north side of the house in dense woods. They received no water during the whole miserable summer, and scarcely any sunlight. In spite of this grilling handicap, they did not even droop, and actually made considerable new growth.

"As a shrub for foundation planting, either in shade or full sun, it is excellent. Its upright dense habit of growth makes it ideal for hedges, as it thrives equally well in shade as in full sun."

No Charge Offer Repeated

To every customer whose purchases of plants or seeds this spring are \$10.00 or more, we will send without charge, two husky plants of this Barberry Mentorensis. For full description and prices of this new Barberry, see facing page.

Upon request we will send you our catalog of Hardy Plants in which we offer the most complete collection of Hardy Garden Plants grown in this country

Under this Heading are Offered and Illustrated Only the Novelties for this Season

AGAPANTHUS - Blue Lily of the Nile

Beautiful lily-like plants with graceful and ornamental foliage from the base of which springs straight stems topped with clusters of blue lily-like flowers.

Culture: Will thrive in any good ordinary garden soil in full sun or very light shade. Plant in spring. Protect in cold regions.

- ***Umbellatus Mooreanus** Each 60c, Three \$1.70, Doz. \$5.00
Grows about 18 inches high, leaves rather short and upright; flowers are large and dark blue, as large as of *Umbellatus* itself. A lovely small plant for the rockery or near a small pool or stream. June, July and August flowering. Quite hardy.

ALYSSUM - Madwort; Basket of Gold

Attractive early-flowering perennials, suitable for growing on the margins of sunny borders or sunny places in the rock wall or rock garden.

Culture: The varieties offered will succeed in any good, ordinary soil which must be thoroughly drained. They are best grown in groups of three or more in the rock garden, or as edgings to beds. Plant in fall or spring, about 6 to 8 inches apart. *Alyssum Saxatile* is frequently used for carpeting beds planted with spring bulbs, and is very effective for that purpose.

- ***Citrinum** Three \$1.00, Doz. \$3.00, 100 \$20.00
Similar to *Saxatile*, but flowers are pale citron-yellow. 1 foot.
- ***Saxatile compactum** Three \$0.75, Doz. \$2.50, 100 \$15.00
Big clusters of bright yellow flowers in early spring. An excellent plant for the rockery or front of borders. One of the best early yellow plants to sow with Tulips. 12 inches high.

ANEMONE JAPONICA - Japanese Windflower

Valuable plants suitable for massing or as single specimens in the border. They grow rapidly and are profuse in bloom, gaining strength and beauty each year. The blooming period extends from September till mid-November, the large, open flowers furnishing abundant cut flowers and brilliant display in the garden. All are 2 to 3 feet high.

Culture. Ordinary, good garden soil which is well drained will suit all varieties. They do well in light shade or sun, should be watered freely during dry weather. In temperate parts of the United States, fall planting is practical. Best results are obtained from vigorous young plants set out in the late spring. Plant in well drained locations, 8 to 12 inches apart and protect with straw during winter.

- Alba** Three \$1.00, Doz. \$3.00, 100 \$20.00
Purest single white, with yellow center.
- Alice** Three \$1.00, Doz. \$3.00, 100 \$20.00
Large flowers of rose-pink, lilac center; excellent new variety. The best and strongest grower of all pink sorts.
- Huopenhensis** Three \$1.00, Doz. \$3.00, 100, \$20.00
The plant grows from 12 to 14 inches high and from early in August until late in the autumn produces an abundance of flowers about 1½ inches in diameter, of a pleasing mauve-rose.
- Kriemhilde** Three \$1.00, Doz. \$3.00, 100 \$20.00
Double, rich pink; of excellent form and very free.

- Queen Charlotte** Three \$1.00, Doz. \$3.00, 100 \$20.00
Abundant semi-double flowers, broad and perfectly formed; "La France" pink.

- September Charm** Three \$1.00, Doz. \$3.00, 100 \$20.00
Flower is of medium size. The color is delicate silvery pink, shaded with rose, presenting a beautiful color mass when grouped. Extremely free and attains an average height of 2 feet.

- Whirlwind** Three \$1.00, Doz. \$3.00, 100, \$20.00
Excellent double white flowers. An old-fashioned variety but a great favorite.

AQUILEGIA - Columbine

Culture: Columbines succeed in ordinary soils containing plenty of humus, provided by dressings of peat and well-decayed manure. Heavy soils are not suitable for the hybrids, but good for the common species. All prefer partial shade; besides, the flowers develop better, grow larger, and last longer in perfection in partial shade than in sun. Plant in fall or spring, 8 to 10 inches apart. Best grown in groups of three or more. Excellent combined with Japanese Anemone.

- ***Flabellata nana alba** Three \$1.20, Doz. \$3.50, 100 \$25.00
A delightfully dwarf variety for the rock garden, perfect foliage and ivory-white flowers. The whole plant not over 8 to 10 inches high. A quaint Japanese species.

Sutton's Long-Spurred Hybrids

Three \$1.20, Doz. \$3.50, 100 \$25.00
A mixture of lovely long-spurred Columbines from which all harsh tones and inferior forms have been removed.

ASTER - Starwort or Michaelmas Daisy

Lovely autumn-flowering perennials, the value of which for border decoration, or cut flowers, is inestimable. There are scores of lovely varieties in all shades of blue, white, pink, and crimson to select from. They range in height from about 1 to 3 feet. Both the species and varieties may be grown in the hardy borders, or in borders by themselves, or in the wild garden.

Culture: Michaelmas Daisies will thrive in any soil and almost under any rough treatment. They may be grown with other perennials in the mixed border, or in a border in conjunction with Lilies and Tritomas, where they form a gay autumnal display. In June thin out all the weak growths, and retain not more than three to four of the strongest shoots to each plant. These growths will then branch out freely and yield immense heads or sprays of flowers in early autumn. Plant in fall or spring, 2 feet apart, in full sun. Lift and divide every third year.

- Amethyst** Three \$1.40, Doz. \$4.00, 100 \$30.00
A purple-blue variety of outstanding merit. The almost fully double flowers are produced by the hundred on fine upright stems about three feet high.

- Frikarti, Wonder of Staffa** Three \$1.50, Doz. \$5.00
We consider this the best of the summer and fall flowering varieties, in fact it is one of the finest constant summer-flowering plants in existence, and admired by all who grow it. It is neat in growth, upright and of free branching habit. Lavender-blue flowers are freely produced from August until late October. Height about 24 to 30 inches.

AUBRIETIA - Purple Rock-Cress

Although strictly a rock plant, yet they are also most attractive subjects for growing in masses in, or forming edges to borders. They are also much used for carpeting the surface of beds planted with spring bulbs.

Culture: Aubrietias will thrive in any fairly good, well-drained soil. On heavy or damp soils they are apt to freeze out in winter. Best grown in masses in the rock garden, or as edgings. Plant six inches apart in autumn or very early spring.

Sutton's Monarch Mixture Three \$1.40, Doz. \$4.00, 100 \$30.00
A wide range of many unusual colors, making a most brilliant display early in spring. No rock plants are as handsome and valuable as the Aubrietias, Sutton's Monarch Mixture. Provide a rich and glorious color effect. Seed offered in our seed catalog. Strong flowering plants.

BETONICA - Betony

An attractive border perennial, yielding a profusion of flowers, which are most valuable for cutting.

Culture: Will succeed in good, ordinary soil in a sunny border. Best grown in groups of three or more. Plant in autumn or spring, 8 to 10 inches apart.

Grandiflora Three \$1.00, Doz. \$3.00, 100 \$20.00
Close tufty foliage with bright rose-purple flowers on long stems about 2 to 3 feet tall, produced during June, July and August. A lovely plant for a hot, dry place in the border.

CALYSTEGIA

A member of the Convolvulus or Morning Glory family which came to us from Asia. Exceptionally useful for covering bare ground or stumps, or for rock garden decoration.

Culture: Best grown in soil not too rich. Impartial to sandy or heavy loam. Perfectly hardy and easily grown anywhere. Plant in fall or spring twelve inches apart. Divide and replant every third year.

Pubescens, fl. pl. Three \$1.20, Doz. \$3.50, 100 \$25.00
Double Pink Morning Glory. A very valuable prostrate growing plant of neat habit. All summer long it produces double funnel-shaped lilac-pink flowers about two inches across, resembling double Morning Glories. It is a very fine addition to the garden. It will do splendidly in dry and sunny places such as exposed banks or as edgings to dry walks, where it is difficult for other plants to survive. Its constant flowering during the middle of the summer when there are no flowers in the garden makes it very valuable there also.

CAMPANULA - Bellflower

One of the most popular and showy hardy perennials for border or rock garden culture. The flowers are all blue and white in color, and the height ranges from a few inches to several feet. The dwarfier sorts are splendid subjects for edging or growing in groups on the margins of borders or rockeries, and the tall kinds make an effective display when grown in clumps in the middle of the borders.

Culture: All the varieties offered will succeed in ordinary rich soil. The dwarfier kinds like partial shade, and some of the tall species, as *Latifolia*, *Lactiflora*, and *Trachelium* do well in shady border. Plant in autumn or early spring, 8 to 12 inches apart. *Carpatica* requires a cool position. Species like *Persicifolia* and its varieties should be lifted and divided every second year and replanted in good, rich soil, otherwise they will not flower freely. Indeed, all *Campanulas* are the better for a biennial lifting and dividing. To insure fine spikes and large flowers on the taller sorts, feed freely with manure.

****Muralis** Three \$1.40, Doz. \$4.00, 100 \$30.00
Very dwarf plant covered with blue-purple flowers in June. Fine for wall or rock garden. The most popular wall plant or rock plant of the entire *Campanula* group.

Rotundifolia Three \$1.00, Doz. \$3.00, 100 \$20.00
(Blue Bells of Scotland or Harebells). 1 foot. June to August. In the wild it is more slender and taller than in the garden; clear blue flowers. Especially suited for crevices in the rock garden or deep slopes. best planted so as to show pendent habit. Does well also in light shade.

CAMPANULA MEDIUM - Canterbury Bells

Imposing, if not our best biennials. The plants are more or less pyramidal in growth, about two and one-half feet in height, and profusely covered with large, bell-shaped flowers. Extremely showy in mixed borders.

Culture: A rich, well-drained light soil will grow them to perfection. It is well to protect fall-transplanted plants with a little dry covering; remove covering early in March before new growth starts. Plant in early autumn or very early spring, 8 to 10 inches apart, in full sun.

MEDIUM (Single Canterbury Bells).

These have the same habit of growth and are just as lovely as the *Calycanthema*, the flowers, however, do not have the so-called "saucer," but are bell-shaped.

Medium Blue Three \$0.75, Doz. \$2.50, 100 \$15.00
Plants are completely covered with blue bells.

Medium Pink Three \$0.75, Doz. \$2.50, 100 \$15.00
Same as above with lovely pink bells.

Medium White Three \$0.75, Doz. \$2.50, 100 \$15.00
Same as above with pure white bells.

CLEMATIS, DWARF - Shrubby Clematis

Here we only deal with the herbaceous species, the stems of which die down in autumn, and that are of a bushy and non-climbing habit. Those offered are suitable for the mixed border, and make a very effective display when in flower.

Culture: They prefer a chalky, well-drained loam. Where this is not available, mix plenty of lime with the soil. Plant in autumn or spring. In autumn cut the stems back to the soil, and give a good mulching of well-decayed manure.

Integrifolia coerulea Three \$1.20, Doz. \$3.50, 100 \$25.00
A good border plant, growing from 18 to 24 inches high, producing its interesting porcelain-blue flowers from June to August.

CORONILLA - Crown Vetch

Low-growing or creeping perennials of easy culture. Handsome foliage and yellow or purple, pea-shaped flowers are produced in clusters from June until August.

Culture: Any good garden soil will grow them to perfection. Plant in fall or spring, 12 inches apart, in full sun.

***Cappadocia** Three \$1.40, Doz. \$4.00, 100 \$30.00
(*Ibirica*). A first rate and brilliant rock plant. Trailing habit. Glaucous leaves and large, rich, long golden flower heads in June and July. Three inches high. Called in England "Lady Fingers." We consider it one of our best plants for low edging. A splendid novelty.

COREOPSIS - Tickseed

A useful and attractive herbaceous perennial, both for border and cut flowers. They are of easy culture, and produce their golden yellow flowers in profusion throughout the summer.

Culture: All require a well-drained, medium soil. They also need a full, sunny position. Plant in autumn or early spring, 10 to 12 inches apart.

Grandiflora Auricula Superba Three \$0.85, Doz. \$2.75, 100 \$18.00
An improved variety with large bright yellow flowers; one of the best hardy plants. Excellent for cut flowers all summer.

DELPHINIUM BELLADONNA

The *Belladonna Delphinium* does not grow quite as tall as the popular English Hybrids, but they produce more spikes and are more graceful, therefore, more useful for cutting. In fact, they are our loveliest early blue flowers for that purpose. They require the same care and treatment as suggested for the English Hybrids, but may be planted a little closer together, 12 inches apart is sufficient space for them. Their lovely blue spikes are about 3 to 4 feet high and produced in June and again in September.

Cliveden Beauty Three \$1.20, Doz. \$3.50, 100 \$25.00
This is a fine English improvement over the common *Belladonna*. Growing much taller, many more flowers to each spike and of a brighter color. Altogether a fine improvement.

ENGLISH DELPHINIUMS

Wayside Gardens Hybrids Three \$1.60, Doz. \$4.50, 100 \$35.00
Here offered are the newest, the best and the finest to be secured anywhere. The range of colors varies from the palest shade of blue to the deepest indigo-blue and royal purple with many intermediary pastel tones of mauve, pink and lavender blendings. Among these new hybrids are flowers of huge size in both single and double forms. This strain has been raised from seed saved from the finest named kinds in creation. Visitors at our nursery proclaim them the best they have ever seen. Those who wish to perfect their already much prized borders cannot afford to overlook these wonderful hybrids.

WHITE HYBRID DELPHINIUMS

Iceberg Three \$1.00, Doz. \$3.00, 100 \$20.00
Here at last we have a mixture of white Delphinium. The flowers are semi-double, double and single white on 6-ft. stems. Graceful enough for cutting still tall and sufficiently substantial to make noble garden plants. They are of easy culture and look splendidly combined with the blue Hybrids. For a succession of blooms do not permit seed to form.

DIANTHUS - Garden Pinks

A great selection of plants for the sunny border or sunny, exposed places in the rock garden or rock wall. In fact, no rock garden is complete without a liberal planting of the various Dianthus. In England where rock gardening is a well-understood art, Dianthus are used by the thousands. They are perfectly hardy anywhere.

Culture: Plant in ordinary good soil, which must contain some lime and should be well-drained. Planting may be done in fall or early spring, 6 to 10 inches apart, in sunny, dry places in the rock garden, rock wall or on the margin of the border. All love lime and gritty soils.

DIANTHUS - Pinks

Latifolius, Furst Bismarck Three \$1.00, Doz. \$3.00, 100 \$20.00
Similar to the Beatrice in habit and freedom of bloom, its flowers are, however, several shades darker, more like the color of the Paul Neyron Rose.

DICENTRA - Bleeding Heart

Old-fashioned perennials; also known under the name of Dielytra. The species named below have fleshy, brittle stems and finely cut, fernlike foliage.

Culture: Spectabilis should be grown in a partially shady border. Eximia will do well in a similar position, or in the woodland garden, or in a shady nook of the rockery. Plant in fall or very early spring, 8 to 12 inches apart.

***Eximia** Three \$1.00, Doz. \$3.00, 100 \$20.00
(Plumy Bleeding Heart). A dwarf-growing sort, with beautiful, finely cut foliage and showy racemes of pretty pink flowers throughout the season. Too much cannot be said for this fine border plant as it is equally at home in full shade or sun and perfectly hardy anywhere.

DICTAMNUS - Gas Plant or Fraxinella

An old-fashioned, herbaceous perennial. Once firmly established, a plant will continue to thrive in the same spot for several generations. They have ashlike leaves which emit a delightfully fragrant odor, and the quaintly formed flowers are borne in upright racemes. The inflorescence is covered with glands secreting a resinous, volatile matter, which may be ignited in the evening of hot days without any damage to the plants.

Culture: They require a deep, rich, loamy soil and a sunny, well-drained border. Not suitable for heavy, damp soils. Best grown singly, so as to display the handsome contour and beauty of the foliage. Once planted, avoid disturbing the roots. Plant in spring or fall, 10 to 12 inches apart.

Fraxinella caucasicus Three \$1.20, Doz. \$3.50, 100 \$25.00
A very showy border perennial, forming a bush about 2½ feet, having fragrant foliage and spikes of rosy pink flowers with deeper veins during June and July. It is not advisable to transplant often, as it improves with age, it being one of the most permanent features of the herbaceous border.

Alba Three \$1.20, Doz. \$3.50, 100 \$25.00
The white-flowered variety of above.

DIGITALIS - Foxglove

The stately Foxglove is a biennial, and so, in fact, are the many beautiful strains of it with large, spotted flowers. There are, however, three perennial species of considerable beauty which are suitable for the mixed border. All are attractive plants for the shady border or the woodland garden.

Culture: Plants of the perennial species may be planted in autumn or spring, 6 to 8 inches apart, in well-drained, good garden soil. The biennial strains are best transplanted early in spring; if fall planting must be done, protect carefully for the winter. All the kinds described will succeed in ordinary soil in sun or in shade. They make a charming effect when grown in masses, and readily reproduce themselves from seed.

Giant Shirley Hybrids Three \$1.00, Doz. \$3.00, 100 \$20.00
The flower heads are over 3 feet long, crowded with big, bell-shaped blossoms. Colors range from white and shell-pink to deepest rose, many attractively dotted crimson or chocolate.

EDRAIANTHUS - Wahlenbergia

Plants allied to the Campanula, and belonging to the same order. They are mostly suitable for rockery culture.

Culture: They will succeed in good, ordinary, well-drained soil, and may be grown as an edging or in masses on the margin of a sunny border, or rock garden. Plant in spring or early fall, 6 to 8 inches apart.

***Dalmaticus** Three \$1.20, Doz. \$3.50, 100 \$25.00
Low border or rock plant about 3 to 4 inches high, producing blue flowers not unlike the Platycodon; this plant is very rare.

ERODIUM - Heron's Bill

This genus belongs to the Geraniums and flowers throughout the summer. The blooms are quaint and very attractive.

Culture: They require a sandy loam and well-drained position. Plant in spring only.

Chamaedryoides roseum Each \$0.50, Doz. \$5.00
A tiny alpine which flowers throughout the season. Forms neat little tufts of pretty, glossy leaves covered with delicate pink veined flowers carried on 2-inch stems. It likes sun.

GEUM - Avens

Most useful hardy perennials. The varieties offered are showy, free-flowering kinds producing a wealth of attractive flowers which are much prized for cutting. They are of a tufted habit of growth, with pinnate leaves. Excellent for the border.

Culture: All succeed in good, ordinary soil in sunny borders. They, however, require plenty of moisture in summer. Best grown in groups. Plant in autumn or spring, 6 to 8 inches apart. If planted in fall it is well to protect them carefully for the winter.

Coccineum, Mrs. Bradshaw Three \$1.00, Doz. \$3.00, 100 \$20.00
A splendid variety, with large, double flowers of a fiery orange-red, blooming nearly all summer. Grand for cutting.

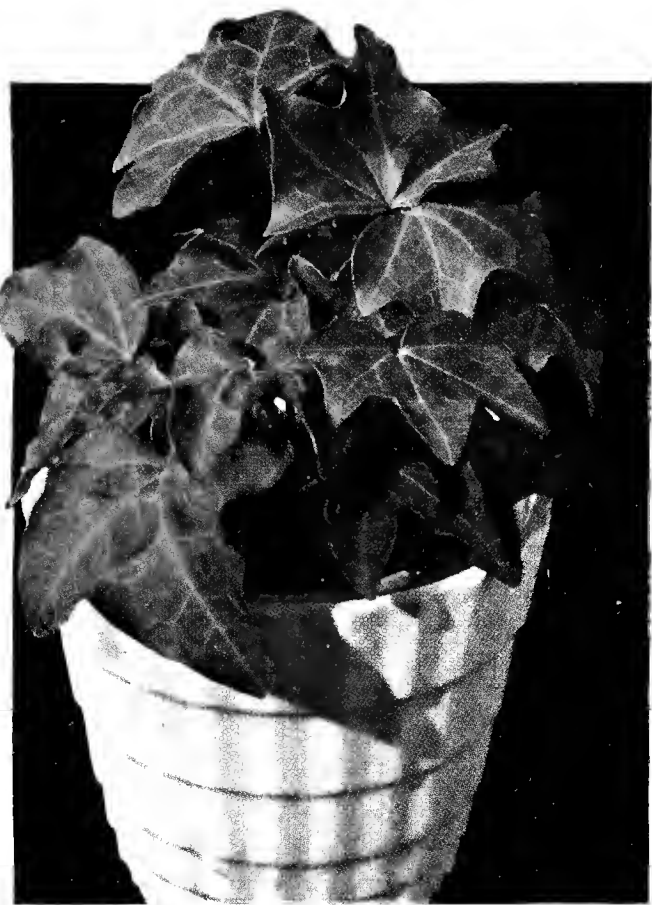

Lady Stratheden Three \$1.00, Doz. \$3.00, 100 \$20.00
A new introduction of great merit. Rich golden yellow blossoms, counterpart of Mrs. Bradshaw. Also a splendid cut flower.

HEUCHERA - Alum Root; Coralbells

Neat-growing and graceful flowering perennials yielding an abundance of flowers suitable for cutting; effective subjects for the margins of borders, as edgings to walks, flower beds, and excellent for the rock garden. They have heart-shaped leaves and bear their dainty blooms in graceful panicles or racemes.

Culture: Heucheras require a well-drained, fairly rich, and not too heavy soil, also a sunny position. Plant 6 inches apart in autumn or early spring. Each spring top dress with well-decayed manure. Lift, divide and replant every third year for best results.

***Rosamundi** Three \$1.20, Doz. \$3.50, 100 \$25.00
We have carefully tested several varieties of Heuchera in all the pink shades during the past few years, and we find that this is the most desirable of the coral-pink sorts. It is a strong grower, not subject to any blight, and produces an abundance of fine coral-pink blossoms on tall, strong stems, which last over two months.

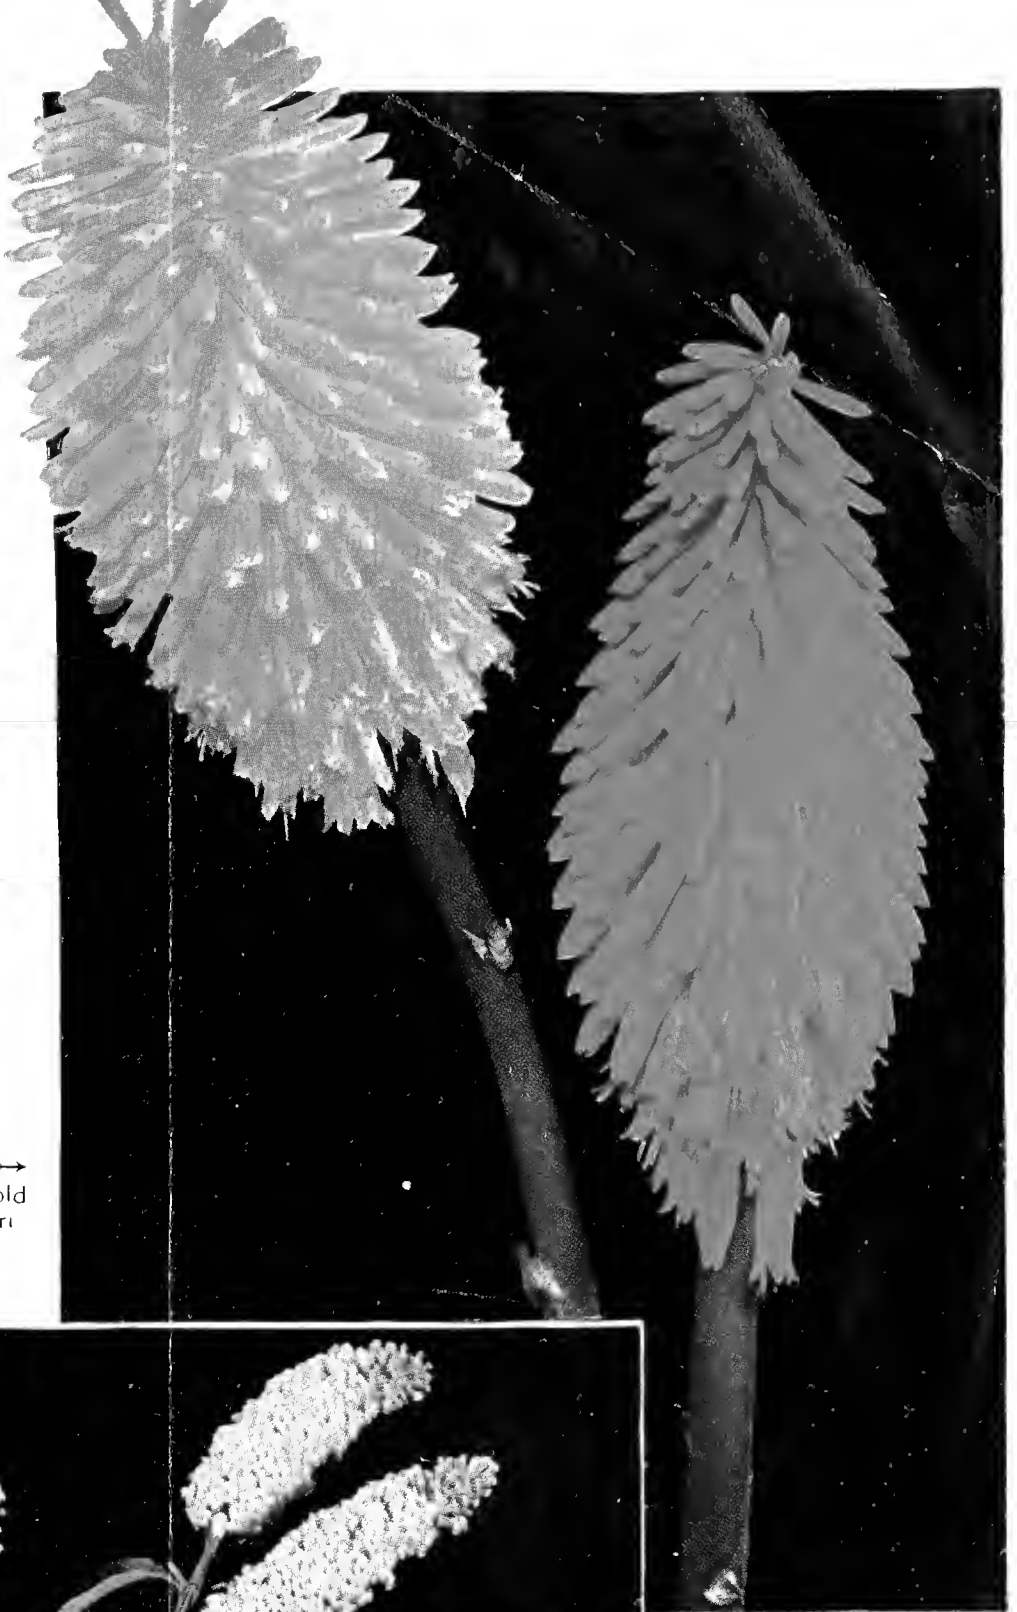

Dwarf Ivy "Albany"

Splendid small table plants, excellent for edging
to flower beds

Each \$0.60, Three \$1.40, Doz. \$4.00

Tritoma →
Towers of Gold
and Pfitzeri

Buddleia "Fortune"

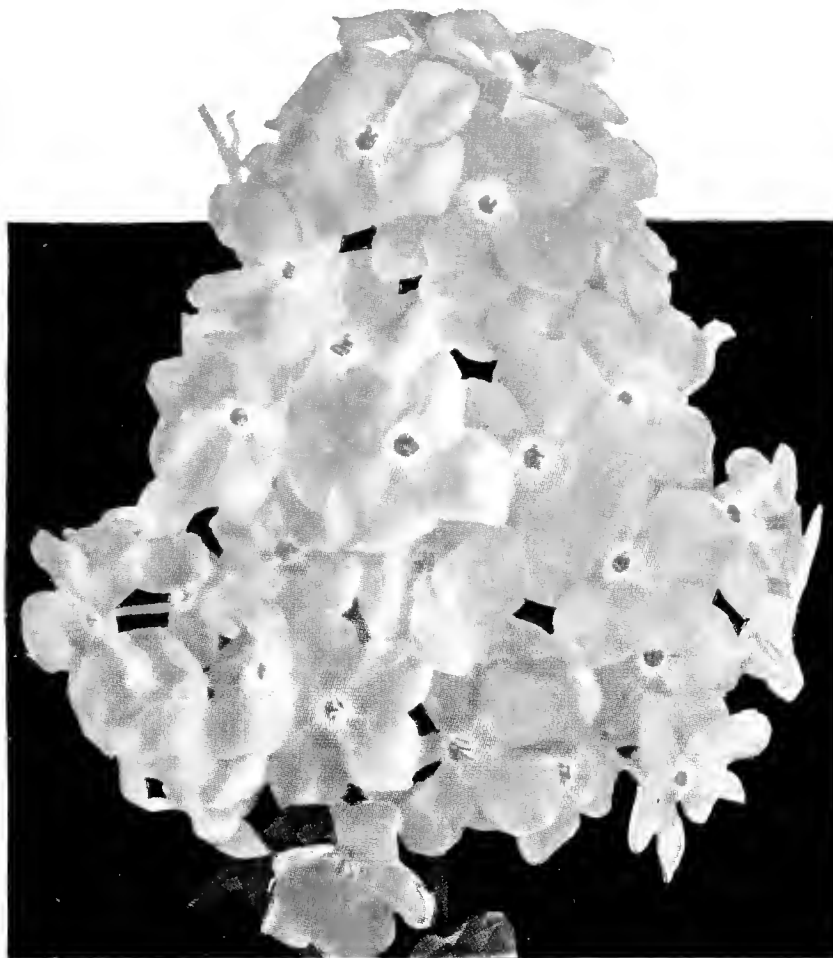

The loveliest of all! A
marvelous plant in the
garden, unequaled as a
cut flower

Each \$1.00

Buddleia, "Fortune"—plant patent No. 206

Erodium Chamaedryoides
Constantly blooming, the daintiest of rock plants

Phlox Columbia—plant patent No. 118
To date the best pink Phlox in existence

Each \$0.50, Three \$1.25, Doz. \$4.00

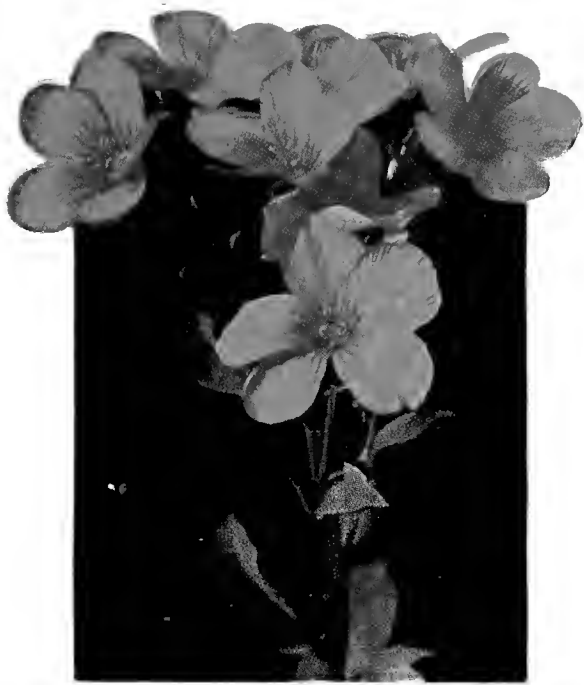

White Hybrid Delphinium, Iceberg

Aster, Wonder of Staffa

The Queen of Asters

Lavender-blue flowers from June until frost; a splendid new all-summer flowering perennial.

Linum Flavum

A most desirable late spring-flowering plant for the hardy border

Three \$0.85, Doz. \$2.75

Double Russian Violet

The rarest and most sweet scented of hardy Violets

Three \$1.20, Doz. \$3.50

Clematis Integrifolia Coerulea

Dwarf blue Clematis. A rare plant for the hardy border

Three \$1.20, Doz. \$3.50

Sutton's Art Shades Lupinus Polyphyllus

For cutting as well as garden decorations

Three \$1.00, Doz. \$3.00, 100 \$20.00

Leontopodium Alpinum, "Edelweiss"
One of the choice rock plants without which
no rock garden is complete

Three \$1.00, Doz. \$3.00

Linum Narbonnense
The best of the blue "Flax." Exquisite when planted together
with pink Tulips

Three \$1.00, Doz. \$3.00

Thermopsis Caroliniana and *Delphinium Fanny Stormonth*
One of the best of the pale blue Delphiniums

Delphinium, *Fanny Stormonth*: Three \$1.20, Doz. \$3.50
Thermopsis Caroliniana: Three \$1.20, Doz. \$3.50

Silene Maritima
A very satisfactory and free flowering
plant for edging to flower beds as well
as for the rock garden

Three \$1.00, Doz. \$3.00

Wayside Gardens Hybrid Delphiniums

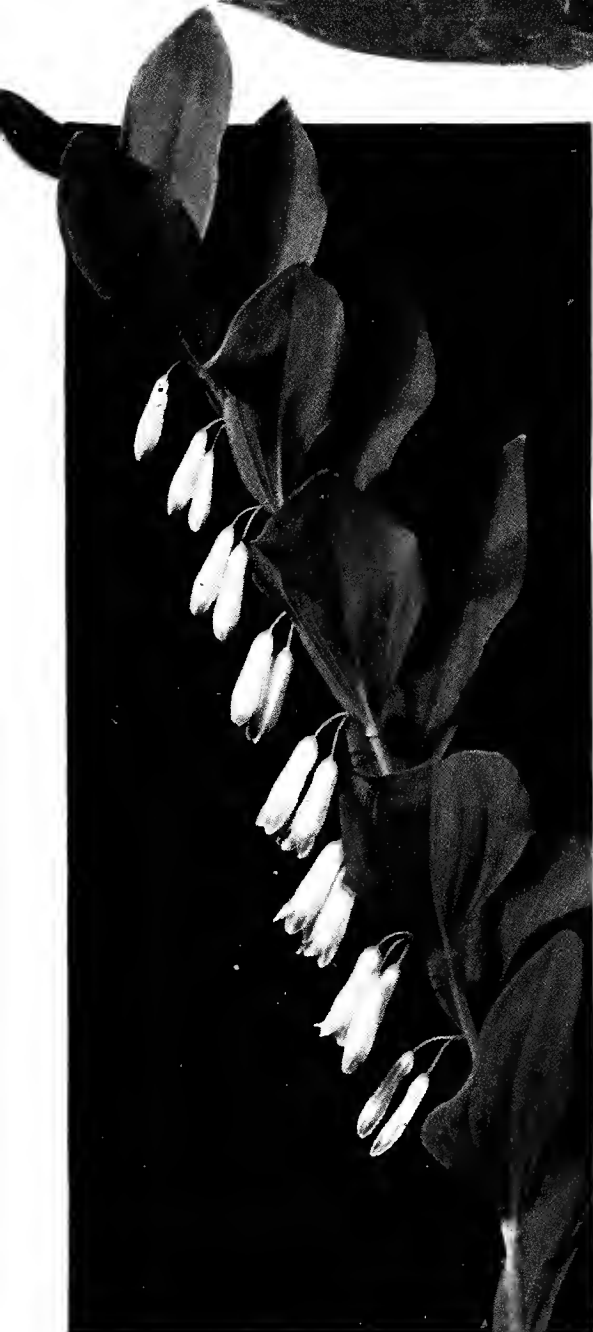

are noted especially for their long life, fine spikes and great variety of form and color

Three \$1.60, Doz. \$4.50

Calystegia Hederacea Fl. Pl.
Double Hardy Morning Glory
for covering banks and difficult places in the rock garden

Three \$1.20, Doz. \$3.50

Polygonatum Multiflorum Major
(Sweet Scented Solomon's Seal)
A stately plant for the border which does well in shade

Three \$1.00, Doz. \$3.00

Aubrietia, Sutton's Monarch Mixture and *Alyssum Citrinum* in an unforgettable display of color in early spring

Aubrietia, Three \$1.40, Doz. \$4.00
Alyssum, Three \$1.00, Doz. \$3.00

Anemone Japonico

Anemone Japonica

(Japanese Anemone)

The varieties illustrated are:

Hupehensis	Alice	Kriemhilde
September Charm	Alba	Whirlwind

All are priced:

Three \$1.00, Doz. \$3.00, 100 \$20.00

Trollius, Lemon Queen and Orange Globe

The two varieties illustrated above are most satisfactory for garden planting as well as for cutting

Each \$0.55, Three \$1.60, Doz. \$4.50

Campanula Muralis
One of the most prized wall Camponulas

Three \$1.40, Doz. \$4.00

Agapanthus, Mooreanus
A small form of the Lily-of-the-Nile
Quite hardy with little protection

Each \$0.60, Three \$1.70, Doz. \$5.00

Componula Rotundifolia
The perpetual flowering Horebell
at home in sun or shade

Three \$1.00, Doz. \$3.00

Hardy Aster, Amethyst
One of the best of those recently introduced. Very free flowering

Three \$1.40, Doz. \$4.00

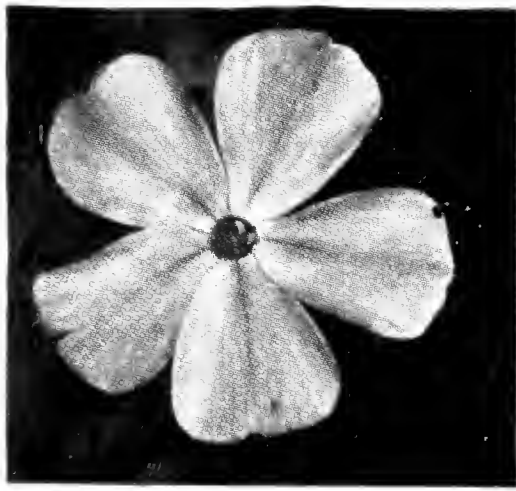

Dianthus, Furst Bismarck
A most satisfactory hardy Pink; easily grown
Very free flowering

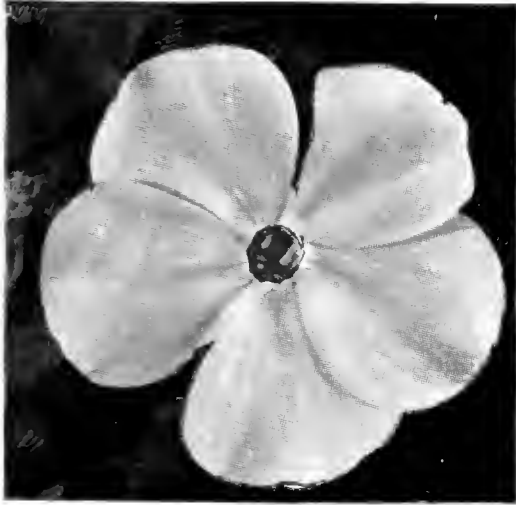

Heuchera, Rosomundi
One of the choicest of pink Corolbells

Three \$1.20, Doz. \$3.50

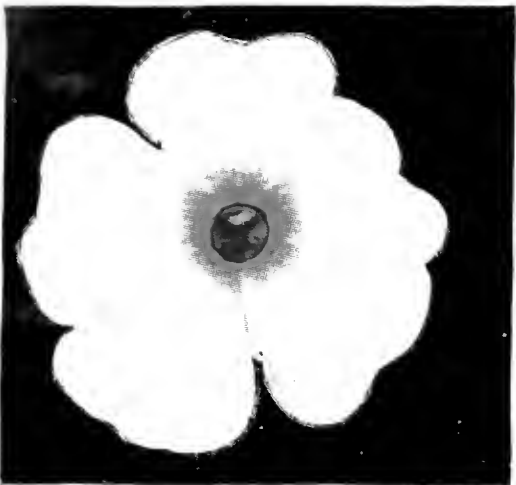

New Hardy Phlox and Lemon Lilies Hemerocallis

HEMEROCALLIS - Day Lilies

Beautiful hardy perennials belonging to the Lily order. For generations great favorites in all gardens, both here and abroad. The numerous species have long, narrow leaves and yellow or orange flowers, many of which possess a delicious fragrance. Very graceful and stately plants for the waterside, naturalizing in grass, or growing in the partially shaded border.

Culture: A rich, well-manured, moist soil is essential for growing these plants successfully. They also prefer partial shade, but do excellently in full sun. May be grown singly or in masses. Plant one to two feet apart in autumn or spring. Lift, divide and re-plant every third year to ensure the plants flowering freely.

Aurantiaca Three \$1.00, Doz. \$3.00, 100 \$20.00
A strong growing and free flowering variety, producing rich orange-yellow flowers in early summer. 2 feet.

Kwanso flore pleno Three \$1.00, Doz. \$3.00, 100 \$20.00
Large, double-flowered variety with rich golden bronze flowers in July and August.

Thunbergi, Lemon Lily Three \$0.85, Doz. \$2.75, 100 \$18.00
Pale lemon-yellow flowers in great profusion all through July. Spikes 2 to 3 feet tall; good foliage.

Bay State Each \$0.65, Doz. \$6.50
Brilliant and glistening deep yellow flowers on 4-foot stems. In full bloom about June 28th. Free-blooming and robust in growth.

J. A. Crawford Each \$0.65, Doz. \$6.50
Rich apricot-yellow shaded light cadmium. Many flowers on 4-foot stems; at their best about June 25th. A lovely plant which looks well in light shade.

The Gem Each \$0.65, Doz. \$6.50
Rich, deep orange-yellow flowers on 3½ to 4-foot stems. In full bloom June 20th. Very finely formed bloom, equal to the best Lilies; truly a gem.

Gypsy Each \$2.00, Doz. \$20.00
Brilliant deep orange flowers on 3-foot, slender stem. In full bloom July 5th. Stems are slender and plant is of medium size. A showy plant for the small border.

Lemona Each \$0.65, Doz. \$6.50
Delicate and pale lemon-yellow flowers on 4½-ft. stems. Blooms are at their best July 1st. One of the finest large blooms, much like a large Japanese Iris in form.

Mrs. W. H. Wyman Each \$1.00, Doz. \$10.00
Lovely light pale lemon-yellow flowers on 4-foot stems. In full bloom August 1st. Very free-flowering and lasts a long time. Latest to bloom of all Hemerocallis.

LEONTOPODIUM - Edelweiss

Low-growing rock plants about 4 to 5 inches high, densely covered with whitish wool with attractive flat, starlike clusters of woolly floral leaves, surrounding very small, inconspicuous yellow flowers.

Culture: Grows to perfection in an elevated position in the rock garden in light, well-drained soil in full sun. Plant in fall or spring, 4 to 6 inches apart.

****Alpinum** Three \$1.00, Doz. \$3.00, 100 \$20.00
A well known Alpine with pretty silvery white leaves; starlike heads clothed with a dense white, woolly substance. A splendid plant for the rock garden, 4 to 5 inches high, easily grown and always of great interest, as this is one of the most famous of rock plants from the European Alps.

LINUM - Flax

Elegant, feathery leaved free-flowering, hardy perennials, suitable for dry, sunny borders or rock gardens. Not suitable for heavy, damp soils.

Culture: Shady or ordinary, well-drained, light soil in a sunny position is essential for these plants. Grow in colonies, and plant in autumn or early spring, 8 inches apart.

***Flavum** Three \$0.85, Doz. \$2.75, 100 \$18.00
Fine variety with transparent, yellow blossoms.

***Narbonnense** Three \$1.00, Doz. \$3.00, 100 \$20.00
Forms a spreading clump of attractive foliage with a profusion of azure-blue flowers with white eye. Very handsome for the rockery.

LUPINUS - Lupine

Stately and beautiful perennials. Their elegant leaves and bold, massive, 3- to 4-foot spikes of blue, white, or pink, pea-shaped flowers, should be placed in the front rank of hardy border plants.

Culture: They require a warm, sheltered position and well-drained, light or medium soil, preferably slightly acid; never give any lime, but plenty of water during dry weather. They are specially adapted for planting in bold groups. Plant in fall or early spring, 10 inches apart.

Sutton's Art Shades Three \$1.00, Doz. \$3.00, 100 \$20.00
A wonderful new strain that may be classed among the most beautiful of all hardy flowers. Colors are both rich and delicate shades of blue, mauve, pink, etc., and the flowers are borne in long spikes that for size and beauty rival giant Snapdragons. The added novelty of being sweet scented makes these one of the best garden plants we have ever distributed.

MYOSOTIS - Forget-me-not

Their dainty blue or pink flowers are produced freely and are always pleasing to the eye, whether massed in beds or on the margins of borders or ponds.

Culture: Most at home in damp positions, as the margins of water, but will thrive in moist shady borders. Plant in autumn or spring about 6 inches apart.

Sutton's Royal Blue Three \$1.00, Doz. \$3.00, 100 \$20.00
Large, rich blue flowers with yellow eye; charming plant for damp places and a more profuse bloomer than the alpestris, which also is inclined to be biennial in habit.

PENTSTEMON - Beard Tongue

Very popular hardy flowering plants. Most attractive for massing in beds or borders. They are not only of graceful habit, but also decidedly beautiful from a decorative point of view. The many species are interesting subjects for growing in the rock garden or border. The flowers are tubular and foxglove-like in shape.

Culture: The Pentstemons require a rich, well-manured, loamy soil, and a well-drained, sunny place. The dwarf kinds should be grown on the margins of the border, or in the rock garden. Plant in autumn or early spring. Place the plants 10 inches apart each way.

Unilateralis Three \$1.00, Doz. \$3.00, 100 \$20.00
A very fine June-flowering variety producing 6 to 10 erect spikes, 24 to 30 inches long, covered from top to bottom with opalescent blue flowers. A beautiful border plant and splendid cut flower, lasting for several days in water.

PLUMBAGO - Leadwort

Should be really called *Cerastostigma plumbaginoides*, but so well known under the first mentioned name that we prefer to offer it that way. Lovely low-growing plants with leathery, small, heart-shaped leaves of bronzy green color. The flowers are a deep peacock-blue borne in small clusters just above the foliage.

Culture: They require a sandy loam which is well-drained and not too rich. Do well in the rock garden in full sun or light shade. May be used also as an edging to beds or garden paths and is lovely when planted together with *Vinca minor* as a ground cover, using two-thirds *Vinca minor* and one-third *Plumbago*. Their brilliant blue flowers are most attractive in late summer and early fall. Plant in fall or spring, 6 to 8 inches apart; cover lightly during winter in exposed places.

***Larpentae** Three \$1.00, Doz. \$3.00, 100 \$20.00
One of the most desirable border and rock plants. It is of dwarf spreading habit, growing 6 to 8 inches high, covered with deep blue flowers during late summer and fall.

**POLYGONATUM - Solomon's Seal**

Popular and easily grown herbaceous plants, producing arching stems furnished with narrow leaves on each side, and from the axils of which drooping flowers are produced. Excellent plants for shady borders.

Culture: They will thrive in any ordinary good soil containing plenty of humus or vegetable matter. May be grown under the shade of deciduous trees, in the shady border, or naturalized in woodland gardens. Plant in autumn or early spring, 6 inches apart.

Multiflorum major Three \$1.00, Doz. \$3.00, 100 \$20.00
Pendent sprays of white flowers borne on long, 2-foot stems in May, followed in autumn with black or purple berries. A grand plant for a shady position, where it has plenty of room to show its pendulous sprays of bells.

PHLOX SUBULATA - Moss or Mountain Pinks

An early spring-flowering type with pretty, mosslike, evergreen foliage, which, during the flowering season, in April and May, is hidden under the masses of bloom. An excellent plant for the rockery, the border, and invaluable for carpeting the ground or covering graves.

Culture: All Phlox Subulata should be grown in full sun. In shade they will die within a year. The soil should be dry and sandy and not too rich. Dig and replant every fourth year to prevent them from getting weedy. Plant in fall or early spring, 8 inches apart.

***Alba** Three \$0.85, Doz. \$2.75, 100 \$18.00
Pure white flowers completely covering the neat compact plant in May; a lovely thing for the rock garden.

***Fairy** Three \$1.20, Doz. \$3.50, 100 \$25.00
Pale blue with dark purple eye; a beautiful little rock plant. Same habit as Vivid. Slow growing, neat in habit, with compact foliage, not spreading like Lilacina.

***Rosea** Three \$0.85, Doz. \$2.75, 100 \$18.00
Rose-pink. Fine for covering banks; thrives in hot, dry situations, and blooms profusely.

PHLOX DECUSSATA - Hardy Phlox

These beautiful hardy border plants are the most effective and useful plants in the garden during the late summer and early fall. Their brilliant colors are loved by all. The great many varieties now offered are quite likely to be confusing, we have, therefore, discontinued growing any but the better and newest varieties noted for their clear colors, freedom of bloom, and strong habit.

Culture: To grow Phlox really well the soil should be well drained, deeply spaded, and enriched with rotted manure or bonemeal. Planting may be done in fall or spring in a sunny border. Set the plants 10 inches apart. Lift and divide every 3 or 4 years or they will become crowded, which results in poor, small flowers. Never let the plants go to seed, never water overhead, always keep blooms and foliage dry, letting hose run slowly on the ground. This method of watering prevents mildew.

Antonin Mercier Three \$1.00, Doz. \$3.00, 100 \$20.00
A delicate lilac-blue; free-flowering variety of medium height and fairly free from red spider. During prolonged hot weather the color fades to a very pale lilac; in light shade, however, the coloring is constant.

Caroline Vandenburg. Three \$1.20, Doz. \$3.50, 100 \$25.00
This Phlox is the most attractive of the lavender shades; it is a true lavender-blue without the magenta shades peculiar to this section. Large, individual flowers.

Count Zeppelin Three \$1.00, Doz. \$3.00, 100 \$20.00
(Graf Zeppelin). Pure white flowers with vermilion-red eye. A striking clean looking Phlox. There is no fading or suffusing of color. Considered the best of the so-called calico types. Very free-flowering.

Daily Sketch Three \$1.40, Doz. \$4.00, 100 \$30.00
This variety possesses compelling beauty. It is vigorous in growth and reaches a height of about 3 feet. The flower trusses are enormous and the individual florets are extra large. Color, salmon-pink with vivid crimson eye. A splendid and worthwhile English novelty.

Ethel Pritchard Three \$1.20, Doz. \$3.50, 100 \$25.00
A delightful French-mauve colored Phlox, which, if seen on a cloudy day, looks almost as pale blue as our native Phlox Divaricata. It is a strong grower.

Leo Schlageter Three \$1.40, Doz. \$4.00, 100 \$30.00
Seldom has one seen a shade of red such as is produced by this fine new Phlox. Its brilliant scarlet blooms seem to glow with fire. This impression is heightened by the fact that there seems to be a decided orange cast to the blooms. Of splendid habit, about 3 feet high with full rich heads of bloom; early. The best red Phlox in existence today.

P. D. Williams Three \$1.40, Doz. \$4.00, 100 \$30.00
Enormous flowers in pyramidal trusses. Soft rose-pink with darker center. Buds and the reverse of petals are rosy red. Grows compactly and retains its color unmarred and unbleached through the entire summer and fall. Height 2½ feet.

Rijnstroom Three \$1.00, Doz. \$3.00, 100 \$20.00
A good strong grower producing an abundance of stems, each one topped with heavy trusses of flowers of a lively rose-pink, much like the color of the Paul Neyron rose.

Saladin Three \$1.20, Doz. \$3.50, 100 \$25.00
A most brilliant scarlet-red with blood-red eye, makes this one of the most outstanding varieties. It is a strong grower, blooms freely, has good foliage.

EARLY BLUE PHLOX

***Divaricata canadensis** Three \$1.00, Doz. \$3.00, 100 \$20.00
One of our native species, which is worthy of extensive planting, commencing to bloom early in April, and continuing through May, with large, fragrant, lavender flowers on stems 10 inches high. In spring this plant is sold in pots to insure best results; in fall field-grown plants are best to use. Likes shade.

Phlox Columbia

INTRODUCED BY WAYSIDE GARDENS IN 1935

(U. S. Plant Patent No. 118)

After growing this variety you will agree with every person that has seen it, that it is the finest pink Phlox ever introduced. Its strength and vigor is something rarely seen in plants. A well-grown, two-year-old plant will produce from six to fifteen spikes. The foliage is rich dark green, leaves covering the stems down to the ground. The flower stalks are about 2½ feet high, stiff and erect. The flowers, when cut, last over a week in water.

Each, 50c; per 3, \$1.25; per doz., \$4.00; per 100, \$30.00.

SILENE - Catchfly or Campion

These perennials are of dwarf habit, and chiefly suitable for rockeries. Two species, however, *Maritima flore pleno* and *Schafta*, may be grown as edgings to sunny borders.

Culture: Grow in good, ordinary soil on the margins of slightly raised, sunny borders or rock gardens. May be grown as a continuous edging or in masses. Plant in early spring or fall, four inches apart.

Maritima Three \$1.00, Doz. \$3.00, 100 \$20.00
Compact masses of glaucous blue foliage. Very neat in appearance. Two to three inches high. From June to August the entire plant is covered with white flowers. Especially happy in a hot dry place in the rockery or for the rock wall.

THERMOPSIS

Only one species is worthy of mention here. This has three-lobed leaves, and yellow, lupine-like flowers borne in long, terminal racemes. It is of graceful growth and specially suitable for the sunny border.

Culture: Ordinary soil in a sunny, well-drained, dry border. Plant in autumn or spring, 8 inches apart.

Caroliniana Three \$1.20, Doz. \$3.50, 100 \$25.00
A lovely lupine-like plant with rich green foliage, growing about 2 feet high. In June and July, yellow, pealike flowers are produced in racemes, 6 to 12 inches long. The general appearance is that of a yellow Lupine.

TRITOMA - Torch Lily; Flame Flower; Red Hot Poker

Also known under the name of *Kniphofia*. A very popular plant for garden decoration. They are of stately growth, have long, narrow, grassy leaves, and bear their drooping, tubular flowers in dense spikes on long, naked stems well above the foliage. They are ideal plants to grow in the border. Coming chiefly from South Africa they must be well protected in cold districts; *Quartiniana*, however, is perfectly hardy. Flowers are prized for cutting in late summer and early autumn.

Culture: Any good, ordinary, well-drained soil and a sunny position will suit *Tritomas*. Plant in spring only, 12 inches apart. A liberal mulching of decayed manure should be spread around the base of the plants in early winter. During severe weather protect the plants by a covering of straw or dry litter.

Pfitzeri Each \$0.45, Three \$1.20, Doz. \$3.50
Hardy if given protection. In bloom from August to October, with spikes 3 to 4 feet high, and heads of bloom of a rich orange-scarlet.

Towers of Gold Each \$0.65, Three \$1.80, Doz. \$5.00
Towers of Gold is unquestionably the finest and most worthwhile *Tritoma* introduced since *Pfitzeri*. Its bold, compact, rich yellow flowers are profusely produced. It is at its best in August

and early September when good flowers are hard to get. Towers of Gold is particularly fine for cutting, and most impressive in the border. It is a really fine plant and should be in every garden where its stateliness and golden yellow color will make it one of the most outstanding subjects.

TROLLIUS - Globe-flower

Hardy perennials belonging to the Buttercup order. The flowers are globe-shaped, yellow or orange in color and useful for cutting.

Culture: They require a deep rich soil containing plenty of humus. They also like plenty of moisture, hence, should be grown in damp, shady corners, or, better still, by the waterside, in bold masses. Plant in autumn or very early spring, 8 inches apart. Each spring give a top dressing of rotten manure. Few plants make a brighter display of color in spring and early summer.

Europaeus, Lemon Queen. Each \$0.55, Three \$1.60, Doz. \$4.50
Free flowering strong growing plant. Flowers pale yellow, produced in abundance on stems about 2 feet high.

Europaeus, Orange Globe Each \$0.55, Three \$1.60, Doz. \$4.50
Desirable free-flowering plants, producing their giant orange-yellow buttercup-like blossoms on stems 1 to 2 feet high from May until August; succeeds admirably in the border in a half-shady position.

THALICTRUM - Meadow-Rue

Hardy perennials, with elegant, finely divided, Columbine or Maidenhair-like foliage, which is most useful for cutting for mixing with cut flowers. Are borne in feathery clusters or panicles, and they add considerably to the beauty of the plants. They are of easy cultivation in sun or shade.

Culture: They will thrive in any good, ordinary, well-drained soil. May be grown in sunny or partially shaded borders. Tall species like *Aquilegifolium* are most effective when grown as single specimens in the front of shrubby borders, or in the wild garden. The other species may be grown in colonies in the garden or border. Plant in autumn or spring, 8 to 12 inches apart.

Aquilegifolium Three \$1.40, Doz. \$4.00, 100 \$30.00
Graceful foliage like that of Columbine, and rosy purple flowers from June to July on 2- to 3-ft. tall spikes; lovely planted together with Poppy Wm. Perry.

Aquilegifolium album Three \$1.40, Doz. \$4.00, 100 \$30.00
White form of the above.

Daphne - Garland Flower

These shrubs are of spreading habit and do not grow over 8 to 12 inches high, producing delicately perfumed rose-pink blossoms. The flowers completely cover the plant not only in spring but again in early autumn. As an edging plant in front of evergreens or shrubs, it is unequalled. It also forms a splendid low hedge along garden walks and around flower beds.

Culture: It prefers a sunny position in well-drained sandy soil. In order to keep the evergreen foliage perfect, protect it with a little straw during the coldest part of the winter. The plants will withstand temperatures as low as 10 below zero. Water sparingly in summer. *Daphnes* will not grow well in cold, poorly drained soil.

	Each	Three	Doz.	100
Young, well-developed flowering plants, 6-7 inches	\$0.55	\$1.40	\$ 4.00	\$30.00

**TREE WISTERIA**

No more lovely sight can be imagined than a Tree Wisteria in bloom. The purplish blue flowers are produced by the hundreds and completely cover the tree during May transforming it into a sheer beauty. In formal gardens Tree Wisterias are indispensable. On the lawn they develop into beautiful specimens and live for generations, increasing in beauty and dignity each successive season. The plants we offer are grown on stems about 4 feet high and the crowns are about 2½ to 3 feet in diameter. Every plant is guaranteed to bloom.

Blue Tree Wisteria

Each \$5.50

The most popular color.

White Tree Wisteria

Each \$6.75

Silvery white blooms.

DWARF ENGLISH IVY**Dwarf "Albany Ivy"**

Each \$0.60, Three \$1.40, Doz. \$4.00, 100 \$30.00

A novel dwarf hardy Ivy for garden or home use. Albany Ivy is a dwarf, compact form of the hardy English Ivy. It is especially well-adapted for evergreen edgings to small beds, pools, fountains, or for planting along a shady walk. "Albany Ivy" is of slow and dense growth, keeping in perfect form without trimming or any effort whatsoever. A fine plant for a choice place in the garden. For table decoration, it is a most valuable plant, lasting the entire winter. Just the thing to put in a small container and grow on the library or dining room table in a shady place where other house plants die.

Two Choice Vines

LONICERA - Honeysuckle**Tellmanniana (Golden Giant Honeysuckle)**

Each \$0.75, Three \$1.50, Doz. \$4.50

A lovely, fast-growing vine and a great improvement over the common Honeysuckle. The leaves are clean, giving a very ornamental effect. The long tubular blooms, which are produced in large-sized clusters, are golden in color and exceedingly fragrant. Altogether a fine climber for shady or sunny porches or trellises. Its clean, rich foliage and fine habit easily make it the most desirable of the Honeysuckles.

POLYGONUM - Silver Lace Vine

One of the fastest growing vines offered; foliage perfectly clean, never bothered by insects or other pests. In fall a sea of foam-like white flowers.

Auberti

Each \$0.50, Doz. \$5.00

A splendid hardy climber of strong, vigorous growth, attaining a height of 25 or more feet, producing in summer and fall great foamy sprays of white flowers, and a well-balanced plant during its long period of flowering is a mass of bloom.

New Hybrid Tea Roses

We offer only Northern Ohio grown Roses, recognized nationally as the finest quality Roses produced in America.

All Roses offered are 2-year-old selected No. 1 grade, which is the finest quality available.

Under this heading we offer only the very choicest and most popular varieties of Tea Roses, with the majority of which every lover of the Rose is familiar. We recommend this collection for general planting to the amateur who wishes the finest varieties, and who is desirous of a supply of extra choice flowers to cut throughout the season. There is not one individual sort which we cannot endorse as possessing superior merit.

Care and Culture of Roses: Lack of space prevents giving complete or worth-while cultural information in this catalog. A fully illustrated booklet has therefore been prepared to cover this subject properly and will be sent to you upon receipt of twenty-five cents.

Amelia Earhart

Each \$1.25, Doz. \$12.50

(Plant Patent No. 63). Truly a lovely garden Rose, producing a wealth of immense, extremely fragrant yellow blooms. Very full flower, graduating from a deep yellow center with outer petals of cream with blush overtone. A free bloomer and strong grower with large, rich dark green leaves. Amelia Earhart will prove the delight of garden lovers everywhere.

Betty Uprichard

Each \$0.75, Doz. \$7.50

One of those delightfully contrastive types; the outside a blend of deep toned carmine with coppery orange; the interior being mostly a delicate salmon-pink.

***Carrie Jacobs Bond**

Each \$1.25, Doz. \$12.50

Of aristocratic growth with large, double blooms of ideal form carried singly on long, upright stems. The color is an enchanting rich deep rose enhanced by a luminous coral sheen. The elegantly formed blooms are moderately fragrant and they are good at all seasons. We feel confident that this will be the most popular Rose of years to come, as it contains vigor, size of bloom, and strong habit to an unusual degree.

Columbia

Each \$0.75, Doz. \$7.50

This beautiful Rose is of strong, vigorous habit and exceptionally free blooming. Color a most pleasing shade of rose-pink and delightfully fragrant.

Condesa de Sagato

Each \$1.25, Doz. \$12.50

A splendid double Rose with the vivid colors of the sparkling species Austrian Copper. The buds are golden yellow, beau-

tifully striped with brilliant capucine red. The open, spicy scented blooms are of similar color. Strong grower and a perfect beauty.

***Crimson Glory**

Each \$1.50, Doz. \$15.00

U. S. Plant Patent No. 105. The plants branch freely, producing a well-spread yet compact bush of good symmetry. Following the large, urn-shaped buds are the well-formed flowers of an intense deep vivid crimson shaded oxblood-red and mellowed by a soft velvet nap.

Cuba

Each \$0.90, Doz. \$9.00

Vivid orange-scarlet buds opening to immense, cuplike flowers of iridescent copper-red and brilliant orange-vermilion. Extremely free-flowering and a vigorous, erect grower.

Dainty Bess

Each \$1.00, Doz. \$10.00

An appropriate name for a daintily colored single Rose of perfect form; a delicate shade of shell-pink with a conspicuous bunch of crimson stamens. A greatly admired, long-lasting, single flower.

Dame Edith Helen

Each \$0.75, Doz. \$7.50

Shapely buds and substantial, high-centered blooms of clear pink, sweetly scented and freely produced on long, strong stems. Vigorous. Most remarkable for the number and beautiful arrangement of its petals.

E. G. Hill

Each \$0.80, Doz. \$8.00

Beautiful long bud of perfect form and full double, high-centered flower of dazzling scarlet, shading to a deeper red as it develops. Strong, vigorous free-flowering habit.

Edel

Each \$0.80, Doz. \$8.00

An enormous bold, stately, well-built flower of great quality and finish. Color white with faintest ivory shading towards the base, passing to a pure white. A fine grower with uniform, stout habit.

Edith Nellie Perkins

Each \$0.80, Doz. \$8.00

A Rose of outstanding merit, vigorous growth and free flowering. Long, pointed bud; flower of good size, long lasting and fragrant, double; outside of petals orient-red shaded cerise-orange; inside salmon-pink.

Etoile de Hollande

Each \$0.80, Doz. \$8.00

Brilliant red blooms of magnificent size, perfect in half-open state, showing clean, attractive centers when fully open; petals enormous; very fragrant. Free flowering.

NEW HYBRID TEA ROSES—Continued

- *Glowing Sunset** Each \$1.50, Doz. \$15.00
U. S. Plant Patent No. 104. The long pointed buds open to full double flowers of most artistic form with the inner petals lengthened and twisted in the bizarre manner of a choice Cactus Dahlia. The color is an indescribable combination of orange-yellow and rose-pink presenting a unique and extremely pleasing color effect. They have an alluring fragrance that will endear them to everybody.
- Hinrich Gaede** Each \$1.00, Doz. \$10.00
Long, pointed, shapely bud of nasturtium-red color, large, double, high-centered flowers of ideal shape of a color unusual and unlike any Rose in commerce—a rich luminous vermilion shaded golden yellow such as is found in high-colored modern Zinnias. Rich, fruity fragrance. A free and continuous bloomer.
- Innocence** Each \$1.00, Doz. \$10.00
Tapering buds, opening to enormous pure white blooms with a center of wine-red stamens tipped with golden anthers. Twelve petals.
- Joanna Hill** Each \$0.80, Doz. \$8.00
Invaluable for the garden. The buds are large, long pointed and open to large, full, semi-double, attractive, long lasting, moderately fragrant flowers of a clear yellow with orange-yellow heart. They are borne singly on long strong stems; growth vigorous, upright, a profuse bloomer.
- Mevrouw G. A. Van Rossem** Each \$0.75, Doz. \$7.50
A most striking blending of dark vivid orange and apricot on a golden yellow ground, frequently with touches of bronze on the reverse of the petals. The sweet scented flowers are very large, of perfect form both in bud as well as in the fully developed flower.
- Mme. Cochet Cochet** Each \$1.50, Doz. \$15.00
Coppery pink. This winner of the Bagatelle Gold Medal is one of the loveliest of the new Roses. The flowers remind us of the beautiful but hard to grow Los Angeles. Long-pointed buds of coppery pink, flushed orange, open to 4½-inch flowers of splendid form of the same color as the bud, except that the orange softens to gold; the petals vary from 30 to 40 in number. When open they disclose a mass of golden stamens. As the flower ages the color changes to a soft satiny pink, with an attractive tinge, but does not lose any of its loveliness and is usually clear and fresh at all times. It has sweet honey-like fragrance. The plants are tall with good foliage and one of the most profuse blooming Roses that we grow.
- Mme. Joseph Perraud** Each \$1.50, Doz. \$15.00
Winner of the Bagatelle Gold Medal 1934, and awarded the honor at Lyons, France, of being "The most beautiful Rose in France for the year 1934." The long, slender and pointed Nasturtium-orange buds open to sweetly fragrant flowers of a charming Nasturtium-buff straying to a lovely shade of shell-pink at the petal edges—the nearest approach to a pure buff, lightened with pink at the petal margins.
- Mrs. Erskine Pembroke Thom** Each \$0.75, Doz. \$7.50
Slender yellow buds and large, well-shaped blooms of bright canary-yellow, deepest in center. Blooms very freely.
- President Herbert Hoover** Each \$0.75, Doz. \$7.50
Large flowers of a very charming combination of cerise-pink, flame, scarlet, and yellow, with broad, thick petals; very fragrant. The clean handsome foliage is an added attraction. The brilliancy of the color is somewhat dimmed by hot weather, but the cool autumn nights develop tones and tints of almost unbelievable richness. A great improvement over Talisman.
- Rev. F. Page-Roberts** Each \$0.80, Doz. \$8.00
Copper-red buds of great length, opening to golden yellow blooms stained outside with red, fully double and very large; fragrant.

GOLDEN ROSE OF CHINA

- Rosa Hugonis** Each \$0.85, Doz. \$9.00
A splendid Rose for the shrubbery border with delicate yellow single flowers produced on long arching sprays early in May; after it has finished flowering it remains an attractive decorative hush for the balance of the season; perfectly hardy.

NEW CLIMBING ROSES

Climbing Roses require no pruning in the spring beyond the cutting out of very old or dead wood, and the shortening of the laterals and long canes to make the growth conform to the space to be covered; but a severe pruning in July, directly after they have finished flowering, is beneficial. Cutting away at that time all old flowering wood will encourage a vigorous growth, which will give an abundance of flowers the following season.

We offer on this and the next page a selection of twelve of the most modern Hardy Climbing and Rambler Roses.

- Apricot Glow** Each \$1.50, Doz. \$15.00
(Patent Applied For). A truly magnificent climber with medium-size flowers of a light apricot color, shading yellow at the base. Produced in large trusses. The flowers are double, nicely formed, of a pleasing fruity fragrance. In color it resembles Jacotte, but being double the effect is richer. It is also a more profuse bloomer and of stronger habit of growth.
- Golden Glow** Each \$1.50, Doz. \$15.00
(Patent Applied For). A true companion of the above of equal vigor. The medium-size flowers are semi-double and profusely produced in clusters of from four to five. The color is pure bright yellow without any shadings. This variety appeals to us as the best yellow Climbing Rose introduced.
- Doublons** Each \$1.50, Doz. \$15.00
Set. H. (M. H. Horvath 1934). Patent. A vigorous climber with heavy wood and handsome glossy foliage. When in bloom the whole plant is literally covered with clusters of large golden blooms. Buds ovoid, deep saffron-yellow, flower large, double cupped; rich gold, fading but little, fragrant. Gives two liberal crops six weeks apart if the first spring blooms have not been cut. We consider this the best hardy yellow climber.
- New Dawn** Each \$1.50, Doz. \$15.00
U. S. Plant Patent No. 1. (Everblooming Dr. W. Van Fleet). Identical in every way with its parent in size and formation of its flowers, color, etc., but blooms continuously throughout the summer and fall.
- NEW POLYANTHA ROSES**
- A type of Roses which is deservedly very popular for bedding purposes. They form shapely, compact, bushy specimens, most of them growing about 8 inches high, producing in great profusion from early in the season, without stopping, until severe frost, trusses of small flowers. Pruning is not necessary; simply remove the past season's flower stems.
- Cameo** Each \$1.00, Doz. \$10.00
A new and distinct color. Shell-pink with salmon suffusion, over which lies a glow of gold. Flowers in large sprays constantly in bloom from June until frost.
- Eblouissant** Each \$0.75, Doz. \$7.50
Glowing, dark red flowers of medium size, shaded heavily with velvety crimson. Large, compact trusses, borne on dwarf but robust plants, which bloom constantly.
- Gloria Mundi; Improved Golden Salmon.** Each \$0.75, Doz. \$7.50
Bright orange-salmon flowers in huge clusters. Growth is vigorous and bushy. Splendid when planted in masses.
- Lafayette** Each \$0.75, Doz. \$7.50
Large, semi-double flowers of striking light crimson; open, frilled form. Blooms very liberally in loose clusters.
- Mrs. R. M. Finch** Each \$1.00, Doz. \$10.00
Bright rose-pink flowers come in branching fragrant clusters. Height about three feet. Exceptionally fine variety for mass planting. A constant bloomer.
- Orange King** Each \$1.00, Doz. \$10.00
Sparkling orange flowers in clusters all summer long. A lovely variety for edging beds with taller Roses. A constant bloomer.
- Princess Juliana** Each \$0.75, Doz. \$7.50
A dainty, sweet combination of maidenblush and peach and ivory. The florets are prettily waved, and strung along the branched sprays.

The New Butterfly Bush

Buddleia "FORTUNE!"

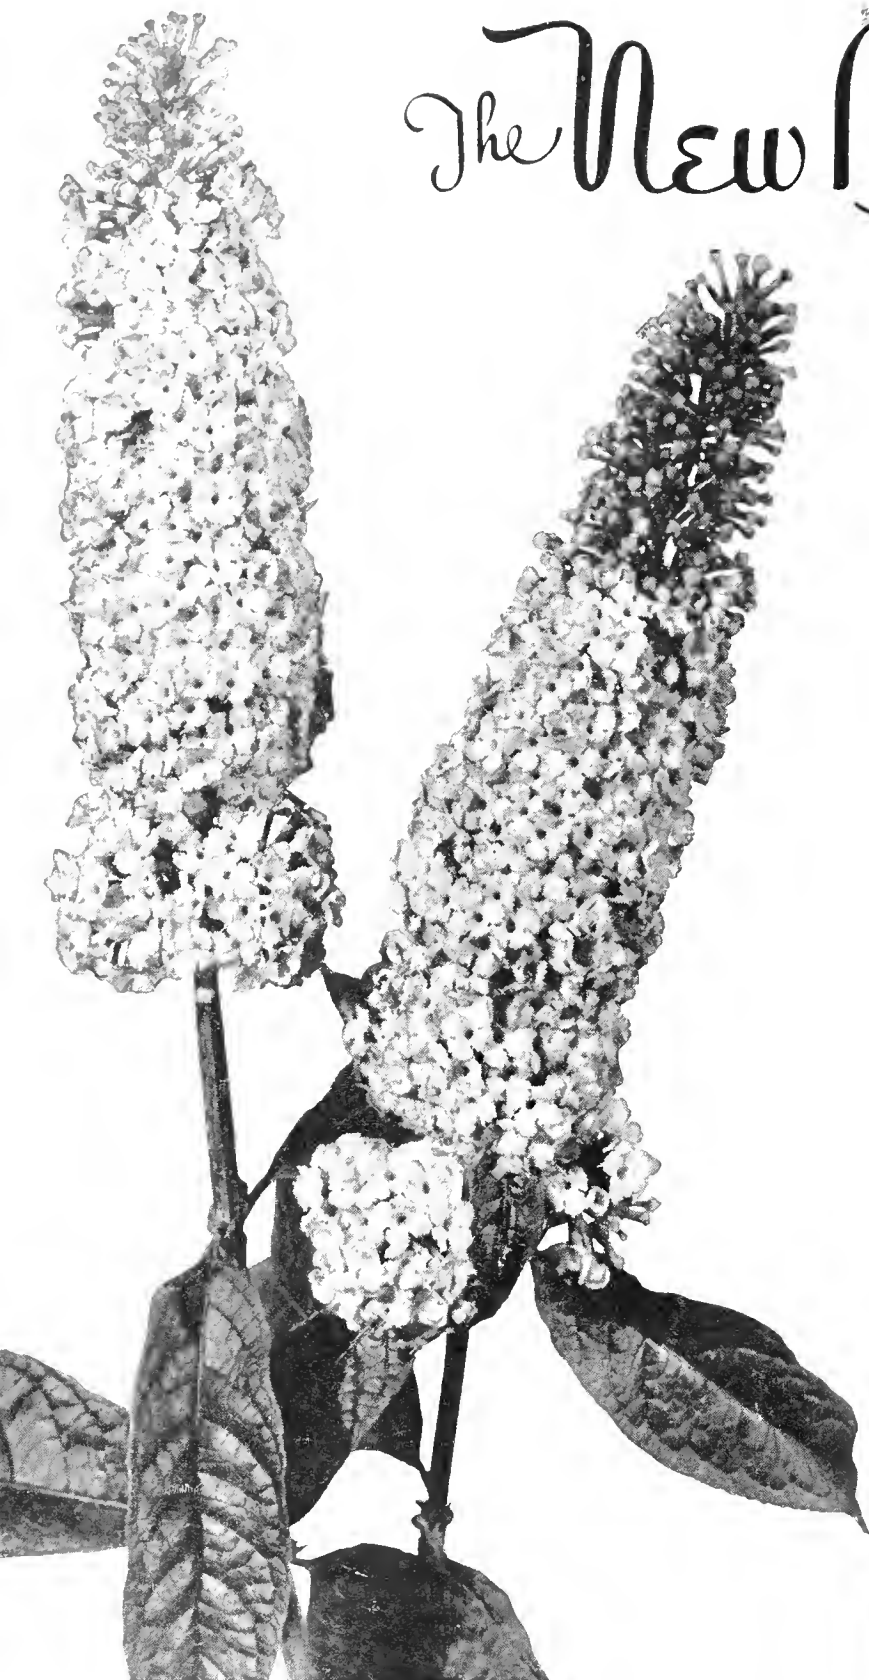

A 1936 Introduction by Wayside Gardens.

Plant Patent No. 206.

Most everyone is familiar with the Butterfly Bush. Several varieties of it have been offered for a number of years. All of them had defects and many shortcomings. In Buddleia Fortune we believe we come very close to perfection. The bush or shrub is of very neat habit, about four feet high and four feet across. It possesses none of the undesirable wild and rough growing characteristics of the older varieties. The foliage of Buddleia Fortune is a deep, leathery, dark green. The color is pure lilac with a brilliant orange eye in each tiny flower, thousands of which make up the sprays which are from twelve to eighteen inches long. The flowers are produced in super-abundance throughout the entire summer and autumn until stopped by frost. The flower sprays instead of being flat on one side as in the old varieties are fully round and in bloom from base to tip practically at the same time. The blooms of the older varieties are faded and brown at the bottom of the spray before the tips are in bloom. To see one of these plants in bloom is a sight worth while. The flowers may be cut with stems 2 to 3 feet long and last in water for several days, which is not possible with older kinds. All of the old kinds wilt very quickly. Buddleia Fortune is a grand cut flower as well as a fine plant for the flower garden. Strong plants that will bloom this summer. (See page A for color illustration).

Each \$1.00

Doz. \$10.00

Sweet-Scented Double RUSSIAN VIOLET

This rare Violet has practically been out of commerce for the past ten years. It is very much sought after by those who know it and want it for the exquisite fragrance of its double flowers. It is slow of growth, does not spread much and it has taken us a goodly number of years to produce a quantity of this fine Violet. Nothing sweeter could be grown by you in your garden. Excellent for that difficult shady place.

Three \$0.85

Doz. \$3.00

100 \$23.00
